PROJECT 1:

Title: Travel Management System (MySql, JFrame, java)

Description:

- The main objective of the Travels and Tourism Management System is to manage the details of Customer, Hotel Booking, Cancellation and Tourism places. It manages all the information about Users, Hotel, Packages etc. The project is totally built at administrative end and thus only the administrator is guaranteed the access to the backend database.

PROJECT 2:

Title: Weather Application (HTML, CSS, JavaScript, API)

Description:
- It is designed to simplify the way to get weather details about any city. Using this application we can check weather ,It uses basic HTML, CSS, and JavaScript, along with OpenWeatherMap's API to provide weather information.
